

StratosHealth has combined the number one rated primary care telemedicine service with the only patented one touch app that connects the caller to the closest crisis or suicide prevention center immediately.

In combination, a service of this kind can not be found anywhere else.

Primary Care Telemedicine

Accessible Anywhere, Anytime.

No more waiting rooms, deductibles, or copays! Whether you're a college student, working family, or retired on medicare, we have a solution regardless of insurance coverage, and every one is eligible. This program can actually serve as your Primary Care Physician with additional access to specialists.

Connecting with a doctor by phone or video is just a tap away.

The mobile app is the complete telemedicine application that lets you search for a physician licensed in your state, book an appointment for phone or HD quality video, receive discharge instructions after your appointment and set your notification preferences.

We give you access to Board Certified Doctors 24 hours a day, 7 days a week, 365 days a year, anywhere in the US and in many countries around the world! It's like a virtual clinic wherever you go. Our talented and trained staff are on call no matter what area of the country you are in. There are no restrictions or pre-existing condition limitations.

Patented Tele-Mental Health

Our patented app provides the best counseling services available today. This app is one tap, confidential, accessible 24/7, and answered by trained professionals who will provide a safety plan to the caller with followup if needed.

There are links to only Nationally recognized hotlines. The call center is geo-located to the caller's phone.

Utilizing our technology allows the caller to contact a variety of organizations designed to help those in crisis. We have the first patented mobile app that connects the caller to the closest crisis or suicide prevention center immediately. The app can be used by the entire family without restrictions.

Our objective is to:

1. Provide instant access to information and resources
2. Reduce Suicide Rates
3. Educate the public about suicide prevention and intervention
5. Respect for all those in need or suicidal.
